COVER LETTER:

Hi, I'm Gabriel Palaoro, bachelor of design since january 2023, when I started my course at University my main focus is digital interfaces and user experience, understanding not only the possibilities of interface design as a digital transmutation of graphic design, but as an interaction medium itself. That's why while I studied UI /UX I was learning some programming languages (HTML, CSS, Js etc.). As a Graphic Designer I have some marketing office experience in Brazil.
